## How the plan works

Each member on the plan can choose a primary care physician (PCP) from one of the physician group systems in the Southern California Select Network<sup>2</sup> – whether it's the one closest to home, school, or work.

- PCP selection determines the physician group system with which each member is aligned. Each covered plan member can select a different PCP with any of the physician group systems.
- The PCP coordinates care, including referrals to other providers or specialists.<sup>4</sup>
- A physician or facility outside of the network will not be covered by your plan, except in the case of emergency or urgent care services.<sup>5</sup>
- PCP selection can be changed anytime after the plan start date by visiting [myCigna.com](#), using the **myCigna® App** or calling the number on the back of the medical ID card.

## Provider group coverage by county

Plans may be limited geographically. Providers are located throughout the majority of the counties. Not all providers may be in the Southern California Select Network. To find in-network providers, use the provider directory on [Cigna.com](#) before the plan start date or [myCigna.com](#) after the plan start date. For live customer service, call 800.244.6224.

1. State laws in Connecticut, New York, Texas and Louisiana may require plan to cover medication at current benefit level until your plan renews. This means that if medication is taken off the drug list, is moved to a higher cost-share tier or needs approval from Cigna before plan will cover it, these changes may not begin until plan's renewal date. State law in Illinois may require plan to cover medications at current benefit level until plan renews. This means that if member currently has approval through a review process for plan to cover medication, the drug list change(s) listed here may not affect member until plan renewal date. If member doesn't currently have approval through a coverage review process, member may continue to receive coverage at current benefit level if doctor requests it.
2. Cigna Healthcare National Book of Business estimate of customers disrupted by 1/1/24 formulary changes.
3. For clients using Standard, Performance, Value or Advantage formularies. 4. If a customer and/or prescriber believes any of the products that will no longer be covered as preferred options are medically necessary, then Cigna Healthcare will review requests for a medical necessity exception.

Health benefit plans vary, but in general to be eligible for coverage a drug must be approved by the Food and Drug Administration (FDA), prescribed by a health care professional, purchased from a licensed pharmacy and medically necessary. If your plan provides coverage for certain prescription drugs with no cost-share, the customer may be required to use an in-network pharmacy to fill the prescription or the prescription may not be covered or reimbursement may be limited by your plan's copayment, coinsurance or deductible requirements.
